RAFIE ROJAGAT BACHRI

Software Engineer | Android, Web, and AI Developer

North Jakarta, Indonesia | +62 857-5036-4678 | rojagatrafie@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Informatics graduate from UPN "Veteran" Jakarta with hands-on experience developing Android and web applications using Kotlin, React.js, and JavaScript. Experienced in REST API integration, Firebase services, and machine learning integration in Android applications. Familiar with AI-assisted development and prompt engineering to support coding and debugging. Bangkit Academy graduate with leadership experience in web development mentoring, seeking internship or entry-level software engineering opportunities.

EDUCATION

Universitas Pembangunan Nasional Veteran Jakarta South Jakarta, Indonesia
Bachelor's Degree in Informatics *August 2022 – July 2026*
GPA: 3.89/4.00

TECHNICAL SKILLS

Programming Languages: Kotlin, JavaScript, Python, Java, PHP
Android: Jetpack Compose, Retrofit, Kotlin Coroutines, Jetpack Paging 3, MVVM, Material Design, XML Layouts
Web: HTML, CSS, React.js, Next.js, Tailwind CSS, Bootstrap
AI & Machine Learning: Scikit-learn, Random Forest, Model Evaluation
Data Analytics: Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization
AI-Assisted Development: ChatGPT, Codex, Google Gemini, Google Antigravity, Prompt Engineering
Back-End & Databases: Node.js, Express.js, MySQL, Firebase, MongoDB, PostgreSQL
Development Tools: Git, GitHub, Postman, Android Studio, VS Code, Figma, Google Colab

SELECTED PROJECTS

RestUP - Sleep Quality Classification App (Undergraduate Thesis) *October 2025 - June 2026*
Machine Learning & Mobile Developer
Technologies: Kotlin, Android Studio, Python, Machine Learning (Random Forest), Firebase
- Developed a Kotlin Android application integrating a Random Forest model to classify sleep quality into three categories using survey data from 315 students across multiple Indonesian universities.
- Applied balanced class weights, increasing recall for poor sleep quality from 83% to 94% compared with the baseline and achieving 92.06% accuracy on 63 test samples.
- Implemented educational articles, a sleep debt calculator, and links to external healthcare services such as Halodoc.

Personal Portfolio Website *September 2025 - Present*
Front-End Developer
Technologies: React.js, Vite, Tailwind CSS, Firebase, Google Gemini API
- Built a responsive portfolio website using React.js and Tailwind CSS to showcase 5+ software projects, academic achievements, and professional experience.
- Integrated an AI chatbot using the Google Gemini API to support visitor interactions within the portfolio website.
- Developed an admin dashboard to manage project and certification content without modifying the source code.

Sentry - Phishing and Scam Detection Website *August 2026 – October 2026*
Front-End & Machine Learning Developer
Technologies: React.js, Vite, Tailwind CSS, FastAPI, Python, Machine Learning (Random Forest & Naïve Bayes), PostgreSQL
- Co-developed a web application to help users assess suspicious links and messages, building the front-end with React.js, Vite, and Tailwind CSS.
- Developed the machine learning models used for detection and collaborated with a teammate to deliver the application.

PlanetKu (Smart Waste Management App) *October 2024 - December 2024*
Mobile Developer
Technologies: Kotlin, Android Studio, Firebase, Machine Learning, Google Maps API
- Developed Android features for PlanetKu, a Bangkit capstone application for waste management, using Kotlin and Firebase.
- Collaborated with machine learning teammates to integrate waste classification into the application.
- Implemented a carbon footprint calculator and used the Google Maps API to build a waste bank locator.

Computer Crafter Website *May 2024 - June 2024*
Full-Stack Developer
Technologies: HTML, CSS, JavaScript, Bootstrap, PHP, MySQL
- Built a web-based PC configuration tool using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL.
- Implemented rule-based compatibility checks to identify mismatched components in a database of 50+ PC hardware items.

RELEVANT EXPERIENCE

Bank Mandiri x Rakamin Academy Remote
Project-Based Virtual Intern: Mobile Apps Developer *March 2026 – April 2026*
- Developed a Kotlin Android news application with 3 screens and integration with 3 REST API endpoints.
- Applied MVVM architecture, Retrofit, Kotlin Coroutines, and Jetpack Paging 3 to organize application logic and implement paginated news lists.
- Completed the project-based virtual internship with a final assessment score of 88.71/100 and an "Excellent" rating.

Kelompok Studi Mahasiswa (KSM) Multimedia UPN Veteran Jakarta South Jakarta, Indonesia
Head of Web Development Class *February 2025 - January 2026*
- Led a 2-person mentoring team delivering front-end and back-end web development classes to 26 students, with a capstone project as the final assignment.
- Delivered a web development session to 30+ students at SMA PKP Jakarta Islamic School as a speaker for the Multimedia Vibes Project.

Himpunan Mahasiswa Informatika (HMIF) UPN Veteran Jakarta South Jakarta, Indonesia
Information Technology Staff *January 2025 - January 2026*
- Produced 5 technical video tutorials for the HMIF YouTube channel through the CodeVox program, covering web development, Android development, Git and GitHub, and machine learning.
- Mentored 15 incoming Informatics students during MABIM, supporting their academic orientation and transition to university.

Bangkit Academy led by Google, GoTo, Traveloka Remote
Mobile Development Cohort *September 2024 - January 2025*
- Completed 900+ hours of Kotlin-based Android development training covering application architecture, UI/UX, and REST API integration.
- Collaborated with a 6-member cross-functional team to develop PlanetKu as the capstone project under industry mentorship.

TRAINING & CERTIFICATIONS

Google (via Coursera) *August 2026*
Google AI Professional Certificate
- Applied generative AI tools to prompt engineering, data analysis, and AI-assisted coding and application development.

Badan Nasional Sertifikasi Profesi (BNSP) *February 2026*
Programming Assistant
- Completed practical competency assessments in software module compilation, testing, debugging, and algorithmic problem-solving.

Amazon Web Services (AWS) *October 2025*
AWS re/Start Graduate
- Completed 400+ hours of cloud computing training covering Linux, Python, networking, and security, with hands-on labs using Amazon EC2, Amazon S3, IAM, and Amazon RDS.

Hacktiv8 & IBM SkillsBuild *July 2025*
Student Development Initiative - Code Generation & Optimization
- Applied IBM Granite to generate, refactor, and debug code through practical exercises in AI-assisted software development and prompt engineering.

Certiport, a Pearson VUE business *December 2024*
IT Specialist – Data Analytics
- Demonstrated foundational knowledge of data preparation, analysis, visualization, and communication of findings, including data quality and responsible data handling.
