North Jakarta, Indonesia | +62 857-5036-4678 | rojagatrafie@gmail.com | [Linkedin](#) | [Portfolio](#) | [Github](#)

EXECUTIVE SUMMARY

Final-year Informatics student at Universitas Pembangunan Nasional "Veteran" Jakarta with a strong interest in Front-End and Mobile Development, building responsive, user-friendly applications using Kotlin and JavaScript. Focused on writing clean, maintainable code and creating seamless digital experiences. Experienced in leading mentoring teams, integrating REST APIs, and collaborating in cross-functional environments. Highly motivated to secure internship opportunities to contribute, collaborate, and create innovative and impactful digital solutions.

EDUCATION

Universitas Pembangunan Nasional Veteran Jakarta

Informatics, Faculty of Computer Science

GPA: 3.89/4.00

South Jakarta, Indonesia

August 2022 - Present

TECHNICAL SKILLS

Coding Language

- Kotlin
- Java
- JavaScript
- Python

Front-End & Mobile

- React.js
- Tailwind CSS
- Bootstrap
- Jetpack Compose
- Next.js

Back-End & Databases

- Node.js
- Express.js
- REST API
- MySQL
- Firebase

Tools & Deployment

- Android Studio
- Git / Github
- Postman
- Visual Studio Code
- Figma

EXPERIENCES

Bank Mandiri x Rakamin Academy

Project-Based Virtual Intern: Mobile Apps Developer

Remote

March 2026

- Engineered the "Mandiri News App," a dynamic Android application encompassing 3 main screens that consumes 3 REST API endpoints to display real-time data using modern Kotlin standards.
- Architected the MVVM pattern for clean code separation, leveraging Retrofit, Kotlin Coroutines, and Jetpack Paging 3 to formulate a seamless endless scrolling feature.

Kelompok Studi Mahasiswa (KSM) Multimedia UPN Veteran Jakarta

Head of Web Development Class

South Jakarta, Indonesia

February 2025 - January 2026

- Spearheaded a mentoring team of 2 to instruct 26 students in Front-end and Back-end Web Development, orchestrating a comprehensive curriculum that culminated in Capstone Projects.
- Contributed to various committees, facilitating the execution of KSM Multimedia programs and events.

Himpunan Mahasiswa Informatika (HMIF) UPN Veteran Jakarta

Staff of Information and Technology

South Jakarta, Indonesia

January 2025 - January 2026

- Directed the "CodeVox" educational program by producing and refining 5 technical video tutorials for the HMIF YouTube channel.
- Supported organizational initiatives by serving on multiple committees for HMIF events.

PROJECTS

Personal Portfolio Website

Front-End Developer

September 2025 - January 2026

Technology: React.js, Tailwind CSS

- Engineered a highly responsive personal portfolio website to systematically exhibit 5+ software development projects, academic milestones, and professional experiences.
- Optimized site architecture and user interface, securing cross-browser compatibility and rapid page load performance across all device viewports.

CinemaZone - Movie Ticket Booking App

Mobile Developer

May 2025 - June 2025

Technology: Kotlin, Firebase, Android Studio

- Constructed a movie ticketing application highlighting 4 key implementations: secure authentication, QR Code generation, real-time seat selection, and a user wishlist.
- Incorporated 2 real-time Firebase services to guarantee instantaneous data synchronization across all user devices.

Planetku (Smart Waste Management App)

October 2024 - December 2024

Mobile Developer

Technology: Kotlin, Android Studio, Firebase, Machine Learning, Google Maps API

- Partnered on a Bangkit 2024 Capstone Project, attaining 90% AI accuracy in classifying 5+ distinct waste categories.
- Programmed interactive tools, including a carbon footprint calculator and a waste bank locator, to advance environmental sustainability.

Computer Crafter Website

May 2024 - June 2024

Full-Stack Developer

Technology: HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- Forged an interactive PC building simulator powered by a database of over 50+ hardware components for user customization.
- Devised compatibility logic yielding a 100% success rate in identifying hardware mismatches, thereby eliminating assembly errors.

Mangosteen Maturity Detection App

March 2024 - June 2024

Software Developer

Technology: Python, OpenCV, Tkinter

- Formulated a desktop application achieving 85% accuracy in diagnosing 3 maturity stages of mangosteens via skin color analysis.
- Applied advanced image processing techniques to evaluate high-resolution images in under 2 seconds.

TRAINING & CERTIFICATION

Bangkit Academy (Google, GoTo, Traveloka)

Remote

Mobile Development Cohort

September 2024 - January 2025

- Executed 900+ hours of intensive Kotlin-based Android development training, prioritizing clean architecture, UI/UX principles, and API integration.
- Coordinated with a cross-functional team of 6 members to finalize a Capstone Project under industry expert mentorship.

Certiport - A Pearson Vue Business

IT Specialist - Data Analytics

December 2024

- Secured certification by demonstrating proficiency in data manipulation, analyzing complex datasets encompassing over 10,000+ data points.
- Resolved 5+ real-world business case studies using core analytics principles to generate actionable decision-making insights.

Badan Nasional Sertifikasi Profesi (BNSP)

Programming Assistant

February 2026

- Validated core programming competencies by compiling, testing, and debugging software modules across 2+ languages.
- Conquered comprehensive practical assessments by optimizing algorithms and solving 10+ complex logic problems within strict time limits.

Amazon Web Services (AWS)

Remote

AWS re/Start Graduate

October 2025

- Fulfilled a rigorous 12-week (400+ hours) cloud computing program encompassing Linux fundamentals, Python, networking, and security.
- Provisioned 5+ core AWS services (e.g., EC2, S3, IAM, RDS) in simulated enterprise environments to gain hands-on operational experience.
